

## **George Rebello – SASHG Chair**

*Division of Human Genetics, Department of Pathology, University of Cape Town*

George Trained as a Cytogeneticist in the Laboratory of Rene Bernstein at the then South African Institute of Medical Research (SAIMR) in Hillbrow. He worked in Diagnostic Cytogenetics in Johannesburg and then moved to St Mary's Hospital, London where he completed his MPhil In Human Genetics on Early Amniocentesis. His PhD was gained from University College London and was on the mapping of a small part of the short arm of Chromosome 9 as part of the Human Genome Project. George has worked in Molecular Genetics at UCT since 1997. His interests include Teaching, Bioinformatics, Databases, Inherited Retinal Diseases, Cancer, and Pharmacogenomics. George would like to see all aspects of Human Genetics; Clinical, Counsellor, and Scientists, develop into complete professions with clear career structures and recognised qualification and registration guidelines.
